

Expanded
plastic foam is
a technically
functioning solution
for demanding
conditions.

Light, insulating and durable material
for various industry needs.

JACKON
FINLAND

Solutions from the leading insulation company in the Nordic markets.

Jackon is made for Nordic conditions

Jackon Finland Oy is part of the Norwegian family-owned Jackon Group, that produces modern, energy-efficient solutions and components for the construction and industry.

- Long experience in even demanding targets for different industry fields
- Almost endless possibilities for applications
- EPP, EPS and EPE or XPS foams protect against shocks and humidity
- Expanded plastic foam is safe and hygienic
- Does not contain substances or gases harmful to the environment
- Foam products are 100 % recyclable

Innovative planning according to needs

We plan and packages technical components as agreed with the client and according to requirements. With the help of 3D-drawings and prototypes, we ensure an optimal result.

- Tailored products from all the foams we manufacture
- Material that suits the package or product requirements
- High class material knowledge and planning skills
- Cost effective and technically functional solutions
- Three modern factories in Sastamala and Muurla
- Flexible service according to different client needs.

Properly treated plastic doesn't strain the environment

- Approximately 96% of the world's crude oil is used as fuel oil
- So, much of the crude oil is used directly for energy
- 4% is used to make plastic, half of which to make packaging
- Plastic is a very topical issue in the media; there is plastic in paper, in a cardboard cup and even in a plastic-free cardboard can
- All material can become a problem in a foreign environment
- When plastic is processed properly, it does not create a problem for environment

Technically functioning packages and fish boxes.

Pack lightly and safely

The right kind of package is the most economic insurance for your product when it needs to be transported unharmed – to the town nearby or even across the ocean.

- Expanded plastic foam package is neat, light and recyclable
- Packaging prevents product wobble, shock or vibration
- Protects against cold and humidity
- Food qualified material, no scents or flavors adhered to the product
- Tailored solutions or standard products fast from stock
- Good packaging solution also helps the internal logistics of the client

Ensure an uncut cold chain with fish boxes

Jackon's foam plastic fish boxes are light, durable and insulating. They are a convenient method to ensure an uncut cold chain from the fisherman all the way to the end client.

- The fish boxes support the weight of the fish lifted from the sea
- Suitable for preserving both fresh and smoked fish
- EPS is recyclable and food qualified, clean and transfer durable material
- Comprehensive range of boxes and lids with fast delivery
- No separate folding machine or ice bags needed
- In addition to wholesale- and transportation boxes we offer gift packages

Technical components and efficient insulations.

Even complex parts with millimetre precision

Jackon's technical components are used in many different industries

- Structural component acts as insulation, padding and protection
- Expanded plastic foam is 100% recyclable, light and clean material
- Good impact resistance, chemical resistance and insulation
- When molded, it can act as an insulating and protective frame
- With special raw materials colors, fire resistance and antistatic properties etc. can be added to products
- Applications include frames for air handling units, compression dampers, thermo composters etc.

The core of vehicles, doors and peer pontoons

Jackon's insulations are very well suitable for sandwich-structures. Non-moldable, fiber free and 100 % recyclable materials do not absorb moisture.

- The only Finnish EPP manufacturer to have achieved the IATF 16949 quality certificate for the automotive industry
- Other certificates issued to the factories:
ISO 9001:2015 on quality management,
ISO 14001:2015 on environmental management
and ISO 45001:2018 on occupational health
and safety
- Good adhesion, used in many trucks and caravans as a core
- Jackon's insulations are also suitable for high quality doors
- The products meet the most demanding thermal insulation classifications
- Plastic foam cores for concrete- and plastic pontoon platforms with decades of experience

Experts at your service:

Sales Manager, Cut products

Juhana Peltola

Tel. +358 (0)50 344 8118

Sales Manager, Technical components and Packaging products

Ville Törneblad
